

INTRODUCING

AMBITENERGY

Use what you need. Save what you don't. Predictability you can bank on.

Available now for Texas residential electric customers, Energy Bank gives customers year-round control and predictability with an effortless and automatic experience.

Broad Customer Appeal

Energy Bank appeals to customers across all housing types who are looking for consistency and peace-of-mind.

More Predictability

This plan makes it easier to stick to a budget and avoid unwanted surprises. Customers will pay the same dollar amount each month for the electricity included in their plan.

Sized to Fit Any Home

There are two plan sizes available to best fit your customer's lifestyle and usage: 1,000 and 2,000 kWh a month. Customers can easily change the size of their plan at any time for free if their needs change.

Bank Unused Energy

Any unused kilowatt-hours (kWh) are automatically banked and saved for another month. Banking unused electricity provides a built-in safety net for the months when customers need it the most. If they need to use a little more? No problem. They'll get a low rate for any extra electricity used when banked kWh are unavailable.
